G. R. S. III-2]

General and Revenue Secretariat. | Misc. File No. of 1924

Serial No.

The points referred to in the Memo are the following:

(1) Reduction in the clerical establishment of the Senior Surgeon's office.

(2) Abolishing the Central Medical Stores with its establishment.

(3) Reduction of lighting charges in the Victoria Hospital

(4) Reduction of the Medical School establishment

(5) Raising the Contribution by the Civil & Judiciary Station towards the cost of maintenance of their lepers in the Leper Hospital.

With reference to item No 1 the Senior Surgeon states that the revision of his office establishment was sanctioned in July 20 and it is too soon to think of the possibility of any reduction.

As regards item No 2 he is of opinion that the abolition of the stores will not result in economy and is opposed to the future policy about to be made by placing an order with a firm for supply of the indents of institutions in one place each district, viz, Shimoga or Mysore.

The Senior Surgeon states that the reduction in the lighting charges of the Victoria Hospital, can only be stated after actual experience, by knowing the amount of power that will be consumed in 2 or 3 months.

G. R. S. III-2]

General and Revenue Secretariat. | File No. of 19

Serial No.

The Senior Surgeon proposes reduction in the exhibition of Rs 8/8/0- in connection with the Medical School, by increasing allowance to some of the lecturers and reducing the no. of stipends. He also proposes to raise the tuition fees from Rs 36/- to Rs 100/- per annum.

In regard to item No. 5 the Senior Surgeon states that there is no proposal for raising the present Contribution now charged to the Civil Station lectures.

5948/20-4-21

20.4.21 (Sd) 20/4 3rd Member) Sd/- 20/4/21.

The reduction in the cost of the Medical School will entail proposed by the Senior Surgeon may be approved. I think that there is no necessity to supply the students with books. They must provide themselves with books at their own cost. As regards the raising of tuition fees, it may be [illegible] 22/4.

Please obtain the approval of the Board of Superintendents

The file may be re-submitted with another reference received from the Senior Surgeon today on the same subject.

Sd/- 23/4/21.

Serial No. 2

From the O/C Siwia Surveys, No. G-C3/1438 dt 21.4.21

Suggests that the present stipend of Rs 15/- and Rs 20/- to male & female students be increased to Rs 20 and Rs 25/- respectively and the students made to buy their own books and that 8 males & 4 females pupils be admitted this year, viz. 4 of 25 male pupils and 4 female pupils.

(5) Submitted for orders with reference to para 13 of the Note.

23.4.21 23/4 3rd Member) 23/4/21.

6038
23-4-21

(6) I am not sure able to understand his meaning of para 2 which he Survey Officer may be asked to make clear.

(7) The point for orders is whether we need supply of books free & cost which students should pay. Rates of stipends need not be increased from Rs 15 to Rs 20 as usually in case of male students & from Rs 20 to Rs 25 in case of female students. It is not the practice now where to supply books free to students. The do not supervising school students have to purchase themselves as well as there are books also for students studying for higher Medical examinations. The supply of books to fresh entrants may be discontinued.

CONFIDENTIAL.

No. G.C. 323-2 Office of the Senior Surgeon in Mysore,

Bangalore, 15th April 1921.

FROM

H. B. Mylvaganam Esq., F.R.C.S., (Eng)
Offg Senior Surgeon with the Government of
His Highness the Maharaja of Mysore,
BANGALORE.

To

The Secretary to the Government of
H. H. the Maharaja of Mysore,
Revenue Department, Bangalore.

Sir,

With reference to your Memorandum No.G.18514, dated 2nd April 1921, I have the honor to enclose herein a note on the several points mentioned in the memorandum, from which it will be seen that some reduction of expenditure is possible in connection with the Medical School and effect will be given to the orders of Government that may be passed in the matter as soon as such orders are received. As there will be a change in the staff on account of the transfer of Mr.D.S.Puttanna to Shimoga, the combination of lectures in Surgery, Operative Surgery and Ear, Throat and Nose Diseases could be conveniently brought into force from the next School year.

As regards the amounts available for surrender I agree to the figures as noted in paragraph II of your Memo. under reply, aggregating to Rs.33,350. No more proposals for the opening of new dispensaries will be submitted to Governmen during this year, nor recommendations submitted for filling up any of the vacancies referred to therein.

I have the honor to be,
Sir,
Your most obedient servant,

H.B. Mylvaganam

Offg.Senior Surgeon.

* Except that a sum of Rs 675/- will be required under pay of Sub Assistant Surgeons, as 15 students are expected to pass out of the local Medical School and will be absorbed in vacancies existing in the Department.

Note on the several points referred to in Memo. No. G.18514, dated 2nd April 1921, from the Secretary to Government, Revenue Department, in connection with the possibilities of reducing expenditure in the Medical Budget.

(a) Clerical Establishment of the Senior Surgeon's Office

The revision of the establishment of the Senior Surgeon's Office was sanctioned by G. O. No.G.2219-20-Med.83-19-2, dated 3rd July 1920, after a careful consideration of the grounds for such revision, as set forth in this office letter No.284, dated 30th December 1919. Effect to the revision has been given gradually as hands became available and the full compliment may be said to have been secured only from 1st April 1921 and the work of the office is just being brought to some shape. It is therefore too soon to think of the possibility of any reduction.

(b) Possibility of abolishing the Central Medical Stores.

This idea was once before proposed and actually tried during the year 1908-09 and Messrs. Burgoyne & Birbridges were ordered to supply the indents of the several institutions of the State direct. The total amount paid to the firm on this account was Rs.85815-6-0 and the customs duty paid on the consignment Rs. 5147-14-9 which brought the total cost to Rs.90963 or Rs.91,000/ in round figures.

As the cost of supply of Europe Medicines to all institutions is borne by Government, no separate account of the cost of medicines supplied to each institution is maintained in the books of the Medical Stores. But as the indent prepared by the stores for one year is generally based on the consumption of stock during the previous year it may be presumed that the average of three years' bills

17

bills on account of Europe medicines, paid by the Stores, represents the cost of the supplies made to institutions by the Stores. To this must be added the cost of packing and carriage and the establishment charges. These items for the years 1906-7, 1907-8 and 1909-10, are as below:-

Year.	Medicines	Packing, etc. charges	Establish ment.	Total
1906-7	64738- 1-11	1954- 6- 5	5052-0-0	71744-8-4
1907-8	60522- 6- 1	2009- 3- 4	5076-0-0	67607-9-5
1909-10	65082- 6-11	2163-11- 9	5244-0-0	72490-2-8

Total for three years Rs. 211842-4-5

The average cost per annum comes to Rs. 70,614/-

Adding to this the difference between the pay of the non-gazetted Superintendent on Rs.200 of those times and the average pay of a Surgeon Superintendent Rs.600 at present, 4,800/-

The total comes to Rs. 75,414/-

Adding again, 5 % on account of loss by wasteage, etc. 3,771/-

the cost of supplying medicines to institutions through the Government Stores comes to Rs.79,185/- against Rs.91,000/ the cost incurred in arranging the supply through private firm, showing that the latter was costlier than the former by about 15 %.

Speaking generally also, the cost of sending a number of small consignments addressed to different institutions is bound to be more than that of despatching the whole quantity in bulk to one institution, the Stores. Again, from recent invoices it is found that the cost of packing cases in England ranges from 6s. to as much as 18s. in certain cases, so that the average cost may be said to be about 10s. against Rs.1-8-0, locally paid per deal wood box. As the supplies to each institution are sent in three boxes, medicines in one, instruments and appliances in one and acids in one, the difference in the cost of packing alone, at 7s. per box comes to 21s. for each institution. These facts and figures which relate to the years 1906 to 1910, clearly go to show that the abolition of the Stores is not likely to result in savings, at

at all events, sufficient to justify the step, particularly when the maintenance of a supply, however small, with a small establishment is considered necessary to meet emergencies.

With a view to secure similar data under the present conditions, to guide the future policy, a trial may, however, be made by placing an order with a firm (to be selected after inviting quotations) to supply the indents of institutions in one selected district, say Shimoga or Mysore, each of which contains a fairly large number of institutions to make it worth the while of any firm to accept the order. Should the system be found to result in any reduction in cost, it may then be extended to other districts. During this experimental period, the present stock of the Stores could be used up in complying with the indents of the institutions of the other districts, so that the abolition of the Stores, if ultimately decided upon, could be given effect to without much trouble or inconvenience.

(c). Reduction in the lighting charges of the Victoria Hospital.

The Public Works Department has recently sanctioned an estimate and even allotted a sum of Rs. 10,000 for installation of electric lights in the Victoria Hospital in place of the existing gas lights. This is expected to result in reducing the cost of lighting. But what the reduction will exactly be, can only be stated after actual experience, by knowing the amount of power that will be consumed, say in two or three months.

(d) Reduction of Medical School Establishment.

The establishment of the Medical School consists of one clerk, one attender, and two peons and two thoties, which is the minimum required and does not admit of any reduction

reduction. As regards other items of expenditure, the following reductions seem to be possible without any great sacrifice of efficiency of the teaching.

Tutorial staff.

In G.O.No. 7934-6 Med 31-16 dated 15th June 1917, the late Dr. C.A.Nanjappa was appointed as the Principal and Lecturer in Medicine on an allowance of Rs.100/- and he drew that allowance although for doing merely the duties of Principal, as medicine was not a subject of the first year class, the only class that existed at that time. If Dr.Nanjappa had continued to be Principal till the school developed up to the third year class, he would have continued to draw the same allowance of Rs.100 for the combined duties of Lecturer and Principal. When the Principalship changed hands on Dr.Nanjappa's transfer to Mysore, an allowance of Rs.100 was sanctioned to the next Principal who was already drawing an allowance as Lecturer in another subject and a separate Lecturer in Medicine was also appointed on Rs.75. Thus the present Principal who is also Lecturer in Medicine gets an allowance of Rs.100 for the former duties and Rs.75 for the latter. This seems unnecessary and if, as originally fixed, the allowance of the Principal (who will always be also the lecturer in any one important subject) with lecturing in any one subject be fixed at Rs.100/- the separate allowance of Rs.75 per mensem now given to Mr.Subba Rao as Lecturer in Medicine may be a saving. Rs.900/

The Lecturer in Surgery who gets an allowance of Rs.75 throughout the year, also gets a separate allowance of Rs.75/- per mensem for three months for lecturing in Operative Surgery and a similar allowance is separately paid for

Rs.900/-

lectures on Ear, Throat and Nose Diseases. As an advanced knowledge in these subjects is not required by Sub Assistant Surgeons who cannot undertake such surgical work, instruction in these two subjects could be combined with lectures in Surgery and the separate allowances abolished. This will give a saving of Rs.75 x 6 Rs.450/-

The courses in Hygiene and Forensic medicine which at present extend to one year each, may be reduced to six months each, which is enough to give the students a sufficient knowledge of those subjects for all practical purposes. The lecturers in these subjects can be given an allowance of Rs.75 per mensem for six months only, instead of the whole year. Reduction will be 75 x 12 Rs.900/-

The number of stipends to male candidates may be reduced from 25 to 8, at least for the next year. The expenditure that could thereby be avoided will come to 15 x 12 x 17 3060/-

At present every scholarship holder is supplied with books and instruments costing about Rs.275/-. It is sufficient if they are supplied with the books, etc, during their training and they may be asked to return the same when passing out of the school after the final year examination, so that those books may be made available to the next batch of students. If this proposal is sanctioned with retrospective effect, the 8 boys and 4 girls proposed to be taken on during the coming year could be supplied with the books which will be recovered from the final year students who have just finished their training. Saving on this account is Rs.275 x 12 3300/-

In fact, when the 29 stipended students of Rs 8,610

the present second year class are supplied with the necessary books required by them for the third and fourth year subjects, no further expenditure on books will be required for some time till any of the books in use now get out of use or are changed for other (better) text-books, which will be very rarely and at long intervals.

The rate of tuition fee Rs. 36/- per annum now fixed is too low and may well be raised to Rs. 100 (the rate reported to be in force) in the Medical Schools of Madras, without fear of diminishing the popularity of the school which is bound to attract students from outside, both on account of the better class of instructors and more efficient training given and the salubrious climate of Bangalore. This will mean a considerable increase in the income of the school from private (paying) students. In the case of scholarship holders, it will increase their liabilities should they think of refusing to serve after qualifying.

(e). Raising the contribution towards the cost of maintenance of Civil & Military Station Lepers.

The cost of maintenance of lepers per head per diem is now arrived at by adding the total cost of diet, medicines, water and lighting charges, cost of establishment (medical, clerical and menial) and dividing it by the total number of patients treated. So, there is no scope for raising the rate of contribution now charged to the C. & M. Station. Better scrutiny will be observed in admitting patients, to avoid possibility of patients really belonging to the Station escaping to be charged for their maintenance.

K.B. Mysore

Offg. Senior Surgeon.

No. G.C. 314-3 Office of the Senior Surgeon in Mysore,

Bangalore, 21st April 1921.

22 Regd. No. 22173.

FROM

The Senior Surgeon with the Government of
His Highness the Maharaja of Mysore,
BANGALORE.

To

The Secretary to the Government of Mysore,
Revenue Department,
BANGALORE.

Sir,

In reply to your letter No.G.18003-Med. of the 22nd March 1921, I have the honour to refer you to letter No. G.C. 323-2 dated 15th April 21 from this office and further to point out another means for reducing the expenditure of the Medical School.

2. At present, the cost of books and instruments supplied to each student for the full course, amounts to nearly Rs.300/-. If the Government are not intending to altogether discontinue this practice hereafter, I may suggest that the present stipend of Rs.15/- to male and Rs.20/- to female students be increased to Rs.20/- and Rs.25/- respectively, and the students made to buy their own books. This increase of stipend would involve an extra expenditure of Rs.240/- for the 4 years' course, as against Rs.300/- now spent on the books, thereby showing a saving of Rs.60/- per student. The idea of getting back the old books as suggested by me in my previous communication does not appeal to me. We may either completely discontinue supplying books to the students, in which case, there may be individual hardship on the part of some poor students who may not be able to meet

the cost or give the increase of Rs.5/- stipend as suggested by me.

3. All the pupils who fail in their professional examination will be deprived of their stipends until they pass in the subject they have failed in. Those who fail in one subject will be deferred for 2 months and those who fail in 2 subjects, will be deferred for 1 year. During these periods, they will be deprived of their stipends.

4. The Final year students who complete their course successfully in April, will also not get their stipends from the date of their passing the final examination. This would also give a saving of 2 months' stipend for each student.

5. Early orders are solicited with regard to the purchase of books for the next batch of students and for others who have been promoted to higher classes.

6. Permission is also requested to entertain the applications of students for seeking admission into the Medical School when the next session opens in July 1921. The Government Order No.G.7849-51-Med.130-16-4 dated 29th October 1918 has fixed the number of male pupils to 25 and female to 4 for each year. As the accommodation is very limited, I recommend that 8 males and 4 females pupils be admitted this year.

I have the honour to be,

Sir,

Your most obedient servant,

H.B. Hyderabad

HBM-BVA.

Senior Surgeon's Office,
Bangalore, 28-4-1921.

Dear Sir,

With reference to your D.O. letter No.G.20290-Med. of the 27th instant, I enclose a fresh letter bearing No.G.C.314-3 dated 21st April 1921 in which the confusion alluded to by you has been removed and which may therefore be kindly substituted for the original letter of the same number , the latter being kindly returned to me.

Yours sincerely,

To

B.Ramaswamiya, Esq., B.A., B.L.,
Secretary to Govt.,
Revenue Department.

No G.C.314-3

Office of the Senior Surgeon in Mysore,

Bangalore, 21st April 1921.

FROM

The Senior Surgeon with the Govt. of
His Highness the Maharaja of Mysore,
BANGALORE.

TO

The Secretary to the Government of Mysore,
Revenue Department,
BANGALORE.

Sir,

In reply to your letter No.G.18003-Med. dated 22nd March 1921, I have the honour to invite reference to this office letter No.G.C.323-2 dated 15th April 1921, in the enclosure to which certain suggestions for reducing the expenditure on account of the Medical School, were made and to point out a few more items of reduction in the expenditure of the said institution.

2. At present, each student gets in addition to a monthly stipend (of Rs.20/- for females and Rs.15/- for males) the cost of books and instruments amounting to nearly Rs.290/- for the whole course. Three alternatives for reducing the expenditure on this item are suggested.

(a) The practice of supplying books may be discontinued.

(b) If the above is considered to be likely to cause undue hardship to the students, they may be compensated by an increase of Rs.5/- to the rate of their scholarhips. In this case, the additional cost to Government will be Rs. 5 x 12 x 4 or Rs.240/- for the whole course for each student against Rs.290/- the cost of books, resulting in a saving of Rs.50/- per student. In both these

these cases the students will be made to provide themselves with their own books.

(c) The books may be recovered from students passing out and may be given to others entering the course.

Personally I am in favour of the course suggested in (b).

3. The final year students who complete their course successfully in April will get their stipend only till the end of April. This will give a saving of 2 months' stipend in the case of each student.

4. Early orders may be passed as regards the grant or discontinuance of books, to enable me to frame my indent for books for the next official year.

5. In Government Order No.G.7849-51-Med.130-16-4 dated 29th October 1918 the number of scholarships has been fixed at 25 for male students and 4 for female students each year. As the accommodation in the school is very limited, I recommend that only 8 male and 4 female pupils be admitted this year, as this number is expected to satisfy the needs of the Department in the year in which the new batch will be completing the course of training.

6. Permission is also requested to notify the number of scholarships in the Gazette and to entertain applications from candidates seeking admission into the Medical School for the next session which will commence on 1st July 1921.

I have the honour to be,

Sir,

Your most obedient servant,

H.O. Mayhew

OFFG. SENIOR SURGEON.

CHIEF SECRETARIAT III PROTECTION BRANCH 26 MAY 1921

Sir,

In reply to your letter No.G.21932 dated 20th May 1921, I have the honour to inform you that, if the proposed change in the rules is made applicable to only the fresh batch of 12 stipendiaries to be admitted in July 1921, and the old students are allowed to continue under the old rules, then, the extra cost to Government by increasing the value of the scholarship by Rs.5/- per head per mensem will come to Rs.720/- for the coming year. The cost of one set of the First year books being Rs.75/-, half the cost of 12 sets of books will be Rs.450/- and the saving by the adoption of this course will be Rs. (720 - 450) = Rs.270/-.

2. If, on the other hand, the rule is applied to the old students as well, then the difference in the extra cost works out as shown below:-

Class.	Students.	Half cost of books. Rate.	Amount.
I year.	12	37-8-0	450-0-0
II year.	34	10-0-0	340-0-0
III year.	29	65-0-0	1885-0-0
IV year.	12	25-0-0	300-0-0
Total.	87		Rs.2975-0-0

The extra cost by increasing scholarship by Rs.5/- for all the 87 students will be Rs.87 x 5 x 12 = Rs.5220. Thus the difference will be Rs.2245/-.

I have the honour to be,

Sir,

Your most obedient servant,

Personal Assistant
For Offg.Senior Surgeon.

7.4.161-2.5

Proceedings of the Government of
the Maharaja of Mysore.

R e a d:-

Correspondence ending with letter 314-5 dated 23rd May 1921 from the Offg: Surgeon in Mysore submitting proposals for trenchment in the Medical Department from coming official year and agreeing to surre to the extent of Rs.32,675/- in the current year's allotment in the Medical budget.

O r d e r No.G. 239-2

After a careful consideration of the proposals put forward by the Senior Surgeon, Government are pleased to order the following measures of retrenchment in respect of the Medical School at Bangalore with effect from the 1st July 1921 which result in a saving to the extent of about Rs.7,000/- per annum:-

(1) The Principal of the School, will also be a Lecturer in an important subject, will in future draw a Duty Allowance of Rs.50/- instead of Rs.100/- per mensem for holding charge of the School, besides a Duty allowance of Rs.75/- for lecturing in one of the subjects.

(2) The Separate allowance of Rs. for 3 months for lecturing in Operative Surgery and a similar allowance for the same period for lecturing on Ear, Nose and Throat Diseases be discontinued and the Lecturer

KVC 3/1

in Surgery will teach these subjects also without any extra allowance in future.

(3) The courses in Hygiene and --- Forensic Medicine which at present extend to a period of one year each will be reduced to six months each and the Lecturers in these subjects will be given an allowance of Rs.75/- per mensem for six months only instead of for the whole year.

(4) The number of stipends to male candidates will be reduced from --- 25 to 8.

(5) During the year 1921-22, One half only of the cost of books and instruments will be paid to the First year stipendiary students and the full cost to students of the other classes ~~who~~ who joined the school in the belief that they ~~will~~ were be supplied with books free of cost and have been enjoying the privilege till now.

(6) The Final year students who --- complete their course successfully in April every year will not in future be allowed to draw stipends after the date of their passing the final examination.

2. Government are also pleased to direct the rate of tuition fee in the School be raised from Rs. 36 to Rs.50/- per annum for the present

and

and that a rule be brought into force to the effect that such of the stipendiary students as fail in any of the examinations, whether in one subject or more, should forfeit their scholarships.

3. Sanction is also accorded to the --- surrenders in the current year's Medical Budget to the extent of Rs.32,675/- as proposed by the Senior Surgeon ~~and detailed in the~~ below :—
